## **VOLUME ABSORBING LASER BEAM DUMP**

Alan F. Stewart, Rashmi S. Shah, and Gregory M. Yagiela

## **ABSTRACT**

A volume-absorbing laser beam dump encloses a solution comprising a laserabsorbing solute diluted in a solvent that is non-absorbent of the laser energy. The laser beam dump includes a window to admit a laser beam into the solution. As the laser beam travels through the solution, the diluted solute absorbs the laser energy.
